

With the help of DST-SERB SSR initiative, a 2 Day hands-on workshop on "Techniques related to Molecular Biology of Cancer" is being organized at NIBMG for the faculty members of nearby colleges. This workshop is free of cost to the attendees. No TA/DA will be provided to attendees.

We will be giving hands on training on flow cytometry, real-time PCR, basic bioinformatics training for using publicly available datasets for research. This workshop will use basic tools (web based or available R packages).

Our aim is to give training to college faculty (teaching undergraduate students), so that they disseminate the knowledge to students to make them ready with some basic understanding of advanced techniques and to be better prepared for their career goals. This may also facilitate the college faculties to undertake some projects in future.

\*Important Information: \*

Date of workshop: 20.12.24, 21.12.24

Eligibility: Faculty member teaching undergraduate students

Subject area: Teacher of Biotechnology/ Life science or similar subject

Letter of support: A letter of recommendation will be required from the department head/ competent authority.

Last Date of Application: 30.11.2024

No TA/DA will be provided to attendees

Looking forward for participation. First 25 successful applicants will be selected for training.

**Apply by sending an email to [ss5@nibmg.ac.in](mailto:ss5@nibmg.ac.in)**
