

## Science Setu Seminar

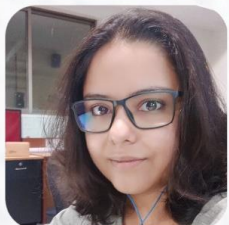

# Common Cancers in India: Early Detection and Prevention

*Cancers of the oral cavity and the cervix are the most common cancers among males and females of our country, respectively. Recent research has helped us identify the genetic and epigenetic basis of these cancers, which can be used to strategize early detection and prevention methods.*

**4TH OF FEBRUARY  
11.30 AM - 12.30 PM**

### Speakers

**Dr. Ankita Chatterjee**  
Experimental Laboratory  
Manager, SYMEC, NIBMG

**Ms. Abarna Sinha**  
Senior Research Fellow,  
NIBMG
